

WHY ERTS?

GOT SPILLS? WE'VE GOT SOLUTIONS.

ERTS manages more than 500 spill incidents per month on behalf of our clients, allowing ERTS to negotiate discounts and special rates with our pre-qualified contractors which are then passed directly to our clients. As a result, we've been able to reduce costs for our clients an average of 34% per incident (including our management fee).

HERE'S WHY.

- ERTS offers a 24/7/365 contact number for all services, nationwide. We're here every time you need us.
- ERTS will customize a spill response program based on your expectations. Everything from the intake questions down to the final report.
- ERTS assigns an accredited Project Manager as a single point of contact for each incident.
- ERTS manages all regulatory compliance on the Federal, State, and Local levels on your company's behalf, eliminating the potential for costly regulatory fines.
- ERTS manages our contractors to ensure the incident is being handled as efficiently and cost-effectively as possible. We also audit our contractor's invoices and will negotiate on your behalf if any discrepancies are found.
- ERTS provides real-time project status communication via our patented ALERTS System. All information is documented and stored on your custom ALERTS System homepage.
- ERTS offers reports at your fingertips, providing valuable data collected from your incidents.
- ERTS offers a variety of environmental programs to help companies reduce liabilities and improve efficiencies.

THE ERTS DIFFERENCE

- 24/7/365 availability with just one call
- Complete coverage across the United States and Canada
- Accredited Project Managers who serve as a single point of contact for each incident/service request
- Management for the most cost-effective solution
- An audited network of highly-qualified contractors with negotiated rates and discounts
- Highest level of customer service
- Project-specific communications and incident tracking with our exclusive ALERTS System
- Login capability to access all incidents and service logs
- Customizable reports generated with a click
